

# Volume de cilindro reto e medidas de capacidade

Prof. Marcos Wesley

## Cilindro reto

Um cilindro é um objeto tridimensional que tem a seguinte forma

## Volume do cilindro

O volume é igual a área da base vezes a altura.

$$V = A_b \times h$$

$$A_b = \pi r^2$$

$$V = \pi r^2 h$$

## Exercício

Em um cilindro circular reto de altura 7 cm, o raio da base mede 4 cm. Calcule o volume desse cilindro.

## Resolução

$$V = \pi r^2 h$$

$$V = \pi \cdot 4^2 \cdot 7$$

$$V = \pi \cdot 16 \cdot 7$$

$$V = 112\pi \text{ cm}^3$$

## Exercício

Calcule o volume de um cilindro de raio igual a 5 m e altura igual a 30 m.

Use  $\pi = 3,14$

30 m

## Exercício

$$V = \pi r^2 h$$

$$V = \pi \cdot 5^2 \cdot 30$$

$$V = \pi \cdot 25 \cdot 30$$

$$V = 750 \cdot \pi$$

3,14

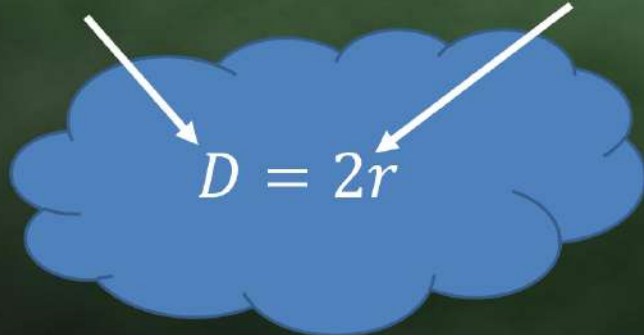

$$V = 750 \cdot 3,14 \longrightarrow V = 2355 \text{ m}^3$$

## Exercício

Determine o volume de um cilindro cujos diâmetro e altura medem 8 dm.

Diâmetro

Dobro do raio

8 dm

## Exercício

8 dm

8 dm

$$D = 2r \longrightarrow 2r = 8$$

$$\frac{2r}{2} = \frac{8}{2} \longrightarrow \boxed{r = 4 \text{ dm}}$$

$$V = \pi r^2 h \longrightarrow V = \pi \cdot 4^2 \cdot 8$$

$$V = \pi \cdot 16 \cdot 8 \longrightarrow \boxed{V = 128\pi \text{ dm}^3}$$
